

## **What Goes on Your Display Board???**

Title: Your project's question/problem

Materials

Procedure

Sketches/Pictures

Data Table and Graph(s)

Conclusion

### **TIPS:**

- Don't forget beautiful work! Use color on your board but not too much that it is distracting to the viewer.
- Everything **MUST** be spelled correctly!
- Make headings for the different parts of your board
- **NOTHING** is written directly on the board. Either type, print, and glue on board or write on paper and attach that paper to the board.
